CREATING BETTER RESULTS

“Our Way is Just BETTER for Orthopedic Patients!”

Imagine arriving at a meeting with your **lawyer** and he or she arranged to meet with **multiple clients** at the same time in the same room!!!

Imagine you needed a **surgical procedure** and in your pre-admission meeting with the doctor, he or she tell you that there will be **two other patients in the OR with you as he likes to work on several cases at once!!**

Imagine sitting down with your **financial planner** to discuss your **unique needs** and **two or three other couples arrive to participate!!**

There are times when you need to be the only focus of a professional's attention. When it comes to providing Physical Therapy, our In-Home PT Program provides One-on-One attention for 60 minutes. That's 100% of our focus on one patient and that means that they get 2 to 3 times more attention than they would at a physical therapy clinic! It's a better way!

60 minutes of undivided attention forms a fast bond with the patient that you just can't get with double and triple booking.

TRUST

Nothing we say about our services matters until you are able to TRUST that what we say holds water. We know you have many options for your patients. In the end, their happiness and quality of life is all that matters.

That's why we let our patients tell our story.

Trust us! Our patients have provided us with more positive testimonials and feedback than any home health agency or brick and mortar physical therapy clinic in the area because they experience significant functional mobility improvements and that makes them **exceedingly happy**. And, we think you should care deeply about what our patients say because **all that matters is a patient's quality of life and how you and I affect it.**

You can read their words and see their faces here:

Excellent physical therapy for my mom, age 90. Helped her regain strength, mobility, endurance and confidence following a hospital stay for pneumonia. The Achieva therapists were so compassionate, friendly professional and helpful. They ... [More](#)

Response from the owner 11 months ago

Susan, this is so amazing to hear. As the owner of the company, stories like this...your mom asking for a new leaf blower...that's just over the top and I'm so proud of all my therapists...they are awesome. Thank you for taking the time to provide this review!!! Be well!!!

Edit

CREATING BETTER RESULTS

“Our Way is Just BETTER for Orthopedic Patients!”

If you have an elderly patient who had an injury with or without surgery, or an elective joint replacement, our program is an easy choice. It's a no-brainer. Imagine that patient is your own mother. Would you rather them have to worry about getting ready early, traveling to and from a crowded gym where they may get 20 to 30 minutes of true one-on-one attention OR would you rather them be in the comfort and safety of their own home and have a great therapy team work with them and only them with no distractions for 60 minutes at 3 times per week? Over the course of their episode of care, our program will give them 2 to 3 times more attention!

Of the 168 hours in a week, the more time a needy senior can spend with a therapist working on their functional deficits increases the likelihood of an excellent result. There is not a single piece of equipment in the physical therapy world that can supersede the benefit of one-on-one attention!

Please check out our past patient feedback...they are quite convincing at truly conveying our worth. Right now, we are blatantly asking you for PT referrals, promising that we send the patients back to you happier!

TRUST

Many of your patients have a condition that responds extremely well to physical therapy and research proves that starting physical therapy early leads to great outcomes.

This is not marketing.

This is the owner of a small, local physical therapy company born in smalltown Pennsylvania, **directly asking you to send us elderly patients** that may suffer from balance problems or falls, mobility challenges from movement disorders such as Parkinson's Disease, or painful conditions, because we will treat them like our own grandparents and **we will send them back to you happier.**

"We Help Older Adults Who Are Struggling To Stay Independent Regain Balance, Strength, and Mobility So That They Can Enjoy A Safe and Active Life at Home and in the Community"

Deep down inside every senior, there is the heart and soul of an active, independent person. Their fortune of living into their "Golden Years" has left them with the misfortune of developing some "rust" on that gold.

We believe that you can get **better at any age**. We believe that struggling to take care of yourself is never a "natural" part of aging. We believe that people who are considered "old" by society's standards are rarely given a chance to remain active and mobile because they are deemed fragile.

Achieva Rehab's In-Home Physical Therapy Program was developed by **Joel Digris**, Physical Therapist, to prove one thing - **folks in their "Golden Years" can thrive no matter what they've been through**. We are pushing seniors to meet their top-end potential every day, helping them ease the worry of losing independence and mobility.

My mother always said: **"Better days ahead."** No matter the age or problem, **there are better days ahead with Achieva Rehab**. You can find our amazing therapists in homes in **Schuylkill County, Luzerne County, and Carbon County**.

Please Call or Fax Orders to 1-888-929-7677. Our phone and fax are the same. Send us ONE patient and let us earn your TRUST!
